

TOP 5 things YOU need to KNOW

1. International experience gives you a chance to apply what you've learned in the classroom in a new country.
2. Working with other students on international projects can be the most memorable part of your undergraduate experience.
3. Employers are looking for applicants who are open to change and have a global consciousness.
4. Programs like Engineers Without Borders provide opportunities to make a difference for people in developing areas.
5. Exchange programs with international universities offer opportunities to those involved in global studies and other S&T programs.

Real world, real work

Through S&T's Career Opportunities Center (COC), you'll have the opportunity to learn outside the classroom in a real work situation. Each year, hundreds of students participate in S&T's co-op and internship programs, earning an average paycheck of more than \$2,600 a month. Not only do students get on-the-job experience through co-ops and internships – many of these positions result in full-time job offers for students after graduation. International companies, such as Boeing, Microsoft, Intel and IBM, along with consulting firms and start-up companies, specifically recruit S&T grads.

at a glance.....

Campus

Our name reflects our mission as one of the world's top technological research universities – a place where discovery, innovation and creativity are the norm. That's the way it's been since our founding in 1870 as the Missouri School of Mines and Metallurgy.

Location

Our 284-acre campus is located in Rolla, Mo., a town of 18,000 in the heart of the Ozarks.

Enrollment

6,800 students – 5,200 undergraduate, 1,600 graduate
 14 award-winning student design teams
 200-plus student organizations
 Students from 47 states and 51 nations

Career Success

Our students get great jobs at great salaries – \$57,300 on average. That's among the highest starting salaries of any university in the nation.

Campus Visits

Tours by appointment, Monday – Saturday.

Global Studies

Requirements include a combination of formal classroom study as well as personal international experience

Missouri University of Science and Technology

Founded 1870 | Rolla, Missouri | www.mst.edu

Goglobal

An educated workforce that can communicate effectively across cultures is a critical need in today's world. The global integration of markets and technologies, coupled with the worldwide spread of information via the Internet, is leveling the economic playing field. In this interconnected marketplace, a variety of work – from aircraft design to tax preparation – can be done anywhere, at any time.

The Global Studies Minor at Missouri S&T will equip you with an increased awareness of the society, culture, technical issues and/or language of at least one country other than the U.S. You'll also spend at least 14 days in a foreign country through one or more of the approved S&T-sponsored trips. The Global Studies Minor complements a broad range of majors and will prepare you for cross-cultural professional opportunities.

Training problem-solvers

At Missouri S&T, curiosity is contagious. That's why we encourage all undergraduate students to look for opportunities to learn more about the world outside of our country's borders. Global awareness requires formal study and personal experience. Our faculty bring their experience into the classroom and into the world every day, and they invite students to join them on learning trips to new and exciting places.

The Global Studies Minor requires at least one three-hour course that focuses on the society, culture and/or language of a foreign country. The other nine hours within the minor may come from any course that includes at least 25 percent international studies content as determined by the Advisory Committee. To satisfy the multi-disciplinary aspect of the minor, no more than six hours may be taken from a single Missouri S&T degree program.

Beyond the classroom

You will have opportunities to participate in at least one Missouri S&T-sponsored trip to a foreign country for no less than two weeks. As a global studies minor, your experience may include any of the following:

- a trip abroad as part of a class or as part of an Opportunities for Undergraduate Research Experiences project
- a trip abroad as part of an extracurricular activity (including Engineers Without Borders field trips)
- an extended trip to another country as part of a Missouri S&T-sanctioned study abroad opportunity.

The Advisory Committee develops and maintains a written policy for reviewing and approving S&T-sponsored activities proposed to satisfy the 14-day international experience requirement.

Get advice

All students, regardless of discipline, can sign up for the Global Studies Minor. To sign up, review the list of courses and complete the Program of Study Form found online at ugs.mst.edu/global_studies_minor.html. Then make an appointment with one of the advisors.
