Geological Engineering Wed. Afternoon Float Trip, 
Jackling 2011 Introduction to Engineering Camp

As part of the Jackling Introduction to Engineering Camp, high school students interested in Geological Engineering were invited to an afternoon float down a section of the Gasconade River, and to learn a little bit about what Geological Engineers do.

First Stop, Lunch from Subway

Going for a swim on a nice day

Digging in the cooler for a sandwich

Getting started floating down the river
There seemed to be some splashing going on

Floating down the river

They found it hard to paddle

Oh No! A collision

They decided to hook up

Dr. Maerz enjoying the trip
Floating down the river

Looks like some of the guys got turned around

Measuring water quality

Excited to have gotten through a tough spot

Dumping extra water out of the canoe

Taking flow measurements
